

Complete Services for Measurements and (Re-)Qualifications of Cleanrooms

Our Services

Metrology & Testing:

- › **Air speed and air volume flow, determination of ventilation rate**
- › **Room pressure differentials**
- › **Filter integrity tests (DEHS-tests)**
- › **Classification of clean rooms (according to EN ISO 14644-1, GMP-guideline and VDI 2083)**
- › **Determination of recovery times (recovery test)**
- › **Noise levels**
- › **Illumination levels**
- › **Microbiological Monitoring**

Compressed Air Quality (according to ISO 8573)

- › **Compressed air purity classes for particles**
- › **Compressed air purity classes for humidity and liquid water**
- › **Compressed air purity classes for total oil (liquid, aerosol and vapour)**
- › **Gaseous and microbial contaminants**

Maintenance of:

- › **Filters (incl. filter replacement)**
- › **Biological safety cabinets (classes I-III)**
- › **Isolators**
- › **Weighing safety cabinets (various manufacturers)**

Flow Visualization:

- › **Remote-controlled video system, Full-HD**
- › **Simultaneous recording of several camera signals**
- › **High quality fog generators (WFI- or SAFEX-based)**
- › **Editing of raw footage according to customer preference**
- › **Creation of training videos**
